

DMK Ingredients products are made from high quality, German fresh milk. After being collected from our cooperative dairy farmers the milk is processed in state of the art production plants. Like this, we have full control of the origin of our milk, starting from the collection, and guarantee total traceability. Due to our specialized technologies and long term experience, our dairy ingredients are produced especially to meet your and our high standards and requirements. Of course, we are certified for modern food standards and fulfil special nutritional requirements like halal and kosher. Our aim is the ongoing optimization of our dairy-based ingredients and services in order to support you in the development of your products and innovations.

Professional Solutions for Applications

Confectionary

The field of confectionary covers a broad range of products with various characteristics. The perfect melting behaviour of chocolate, the distinctive texture of sweets and the creamy caramel taste of toffees will be achieved by using our dairy products and blends. Our products comply with current health trends and enable your customer to discover an exceptional indulgent or excitingly new taste. We offer the perfect solution suiting your requirements for your innovative confectionary products.

A wide range of different product solutions for your application

Milk Powder (Roller Dried Milk Powder and Spray Dried HFF Milk Powder)

- Creamy dairy and light caramel taste for soft melting characteristics and a unique taste in chocolate
- Cost saving due to a high free fat content-especially designed for the chocolate industry

Sweetened Condensed Milk (in different qualities)

- Caramel taste and optimal melting behaviour for high-quality chocolates and toffees
- Perfect for excitingly soft or crunchy fillings
- Long shelf life and easy handling based on its high microbiological stability
- Tailor-made composition exactly meeting your requirements

Cream

- Natural creamy taste with various fat levels from 10 % to 70 % exactly tailored for your requirements
- Optional with additional flavours, stabilizers, emulsifiers etc.

Supply Chain

As part of one of the largest cooperative-based dairy companies in Europe, DMK Ingredients offers a wide range of different packaging systems: from buckets, butter- and cheese-blocks, 25 kg bags, big bags, pallecons to bulk loading-suitable to your needs. As a successful global exporting company we offer a high level of reliability and safety along the complete supply chain.
