

DMK Ingredients products are made from high quality, German fresh milk. After being collected from our cooperative dairy farmers the milk is processed in state of the art production plants. Like this, we have full control of the origin of our milk, starting from the collection, and guarantee total traceability. Due to our specialized technologies and long term experience, our dairy ingredients are produced especially to meet your and our high standards and requirements. Of course, we are certified for modern food standards and fulfil special nutritional requirements like halal and kosher. Our aim is the ongoing optimization of our dairy-based ingredients and services in order to support you in the development of your products and innovations.

Professional Solutions for Applications **Convenience**

From ready meals to dressings – convenience has so many different requirements to meet. In times of changing food patterns and fast moving consumer habits, the demand is growing for innovative product solutions. We offer a broad range of different ingredients to support the creaminess in your dressing, to give a smooth dairy mouthfeel in your soups and pumpable dairy products for easy handling in your production process.

A wide range of different product solutions for your application

Fermented Products (e.g. Yoghurt, Sour Cream and Fresh Cheese)

- Natural taste because of gentle processing and use of different cultures
- Adjustable viscosities for excellent processing properties
- Bake stable and freeze/thaw stable
- Fresh or heat-treated, stabilized, different fat levels or lactose-free – the choice is yours

Cream (e.g. different fat content, optional additives and stabilizers)

- Creamy and fine consistency permitting a smooth mouth feeling
- Available with a higher viscosity for dressings and sauces
- Stable flavour due to gentle processing
- Tailor-made solutions enable easy handling and processing

Supply Chain

As part of one of the largest cooperative-based dairy companies in Europe, DMK Ingredients offers a wide range of different packaging systems: from buckets, butter- and cheese-blocks, 25 kg bags, big bags, pallecons to bulk loading-suitable to your needs. As a successful global exporting company we offer a high level of reliability and safety along the complete supply chain.
